

AGT INTERNATIONAL GDPR COMPLIANCE

AGT International has carried out a program of adaptation to the GDPR Reg. EU n. 679/2016 certain of the importance of personal data security, to protect the people who work with us and to guarantee reliability to our commercial and institutional partners.

The program was conducted in accordance with current best practices on the processing of personal data, with the definition of specific procedures and roles for a data management system.

The functioning of the system and its effectiveness is based on the choice of suitable tools and technologies, to ensure business continuity and full operation even in the face of risky events.

Risk assessment and the design of specific response measures, constant updating and monitoring are the cornerstones of the system.

All suppliers are chosen based on specific rules, so that all subjects who collaborate with AGT can guarantee the same safety and reliability requirements.

Appropriate instructions are given to AGT staff, so that the principles of integrity and confidentiality with which the company operates can be respected in their conduct. To this end, in addition to the dissemination of procedures, training and insertion sessions are also organized for new resources.

After years of experience in the sector, we can say that we are a company that has made data protection one of the main points of its actions, convinced that this aspect fully reflects our professional characteristics.
